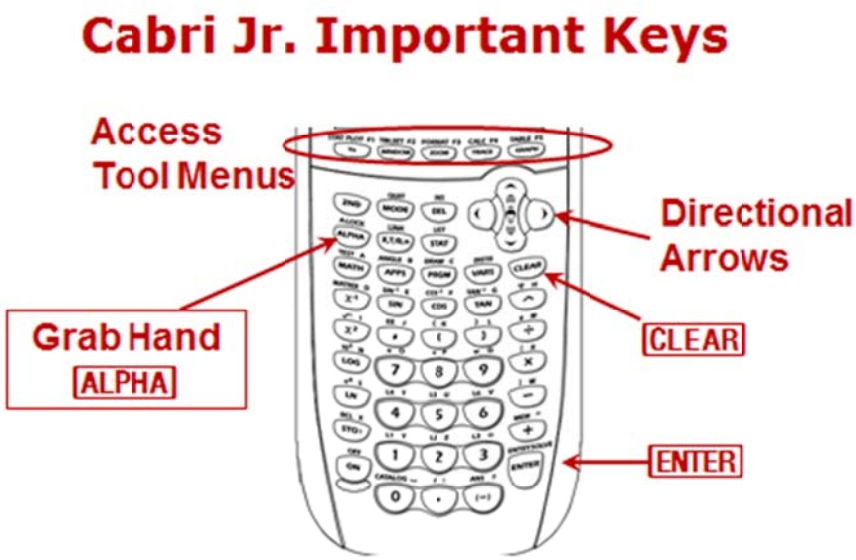
How to … in Cabri Jr. (TI-84+)



Access the tools

Graphing keys
Y=
WINDOW
ZOOM
TRACE
GRAPH

Note: tool icon in upper left corner of screen

Exit a tool

CLEAR key

Grab an available object Note: no other tool can be active.	ALPHA key
Identify which object will be selected (& switch to another)	Watch what is blinking. 2nd will toggle between whole object and a side of the object
Undo	Y= and select Undo
Measure an object	• GRAPH > Measure submenu then choose desired tool • Press ENTER on object • Move to desired location and press ENTER to anchor the result.
Calculate	• GRAPH and select Calculate tool • Press ENTER on number • Press + − × or ÷ • Press ENTER on second number • Move to desired location and press ENTER to anchor the result.
Notes on Color (TI-84+CE or C)	• Preferences in GRAPH menu sets object color • More pixels on color screen so measurements larger
