

reaction time

- The **reaction time program** (reflex.83p) has been downloaded from the TI calculator program archive.
- using **TI GraphLink** or **TI Connect** software, it can be downloaded to a TI-83 or TI-83 plus calculator.
- Go to PRGM => REFLEX
- After ready, set, a series of 10 random horizontal and vertical lines appear, each one requiring the pressing of the appropriate blue horizontal or vertical arrow key on the calculator before progression to the next line.. At the end of the sequence a mean 'reflex' time is calculated:-

```
YOUR AVERAGE  
REFLEX TIME=  
    .9262948207  
SECONDS  
    WELL DONE!
```

an example of a (slow!!) time.
