| <p>Y= ▾ ▾ ▾</p>  <p>ENTER</p> | <p>We have created a new work space</p>  |
| <p>WINDOW ▸</p>  <p>ENTER</p> | <p>Move the cursor to any location</p>  <p>Press ENTER CLEAR</p> |

| | |
|---|--|
|  | <p>What you see is your pointer displayed as a “hollow” arrow. This indicates a selected object.</p> <p>You will also see that the point is “active”.</p> <p>Move the cursor off the point until it is a solid arrow and then move it back to select the object again.</p> |
|---|--|

| | |
|---|--|
| <p>Once an object is selected you can move it by pressing </p>  | <p>As you can see the cursor is now a closed hand. Move the cursor and you will see how to drag a point.</p> <p>After this press </p> |
|---|--|

| | |
|---|--|
| <p>Now we can label the point.</p> <p> </p>  | <p></p>  <p>Note the cursor is again in a new form.</p> <p>Press  to open a text box.</p> |
|---|--|

| | |
|---|--|
|  | <p>The point is now labeled A and the label is attached to the Point.</p> |
| <p>Now Press  (A)</p> | <p>   </p>  |
| <p>Move the cursor and select the point. Press</p> |  |
| <p> and watch the point and the label move on your screen.</p> | |

Selecting and moving any object is done in the same manner.

Draw a line, a segment, a triangle and then select and drag each object.
