

LearningCheck™ App

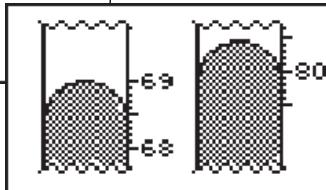

For All Graphing Calculators*

*TI-73 Explorer™, TI-83/TI-84 Plus, TI-89 Titanium, Voyage™ 200

This App allows you to easily create self-check opportunities by sending out review questions, practice tests and more with this great new tool that expands the capabilities of your classroom technology.

LearningCheck gives you real-time communication with the TI-Navigator™ system*. Imagine getting quick and thorough feedback from your students – having a firm answer to: “Did they get it? Can I move on to the next topic?” Users of the TI-Navigator classroom learning system can easily incorporate LearningCheck to experience real-time transfers between teacher and students. You can send assignments to student calculators, and then upload their finished material to your PC for grading and evaluation.

*The TI-Navigator system can only be used with the TI-73 Explorer and TI-83/TI-84 Plus graphing calculators.
