LearningCheck™ Creator

Use LearningCheck™ Creator to create self-check opportunities or exams. You can create review questions or practice tests that provide feedback on correct and incorrect answers to allow students to test their own knowledge. You can create quizzes and exams, send them to student calculators, then upload completed material to your PC for evaluation and grading.

You can use the LearningCheck™ Creator or TI Connect™ to transfer LearningCheck files from a PC to a TI handheld device. The LearningCheck™ App on the device then tracks the answers given and displays results for the document.

LearningCheck™ Creator Main Window

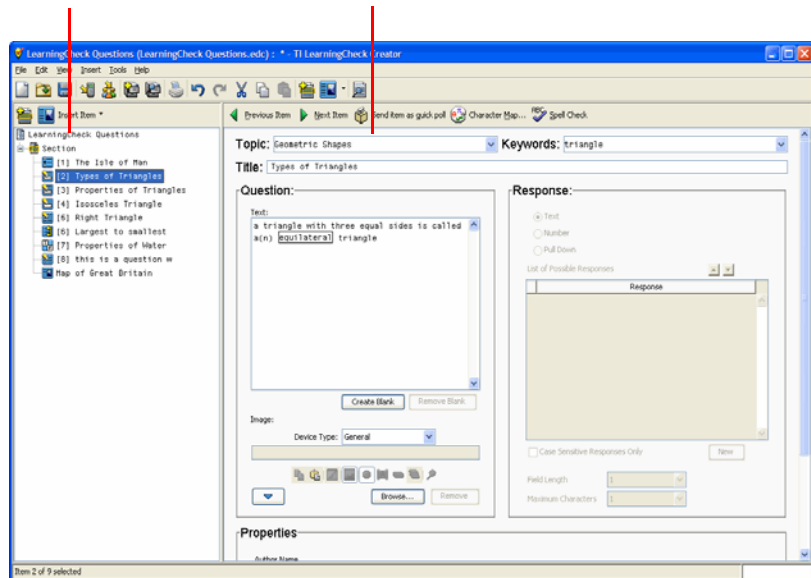

The LearningCheck™ Creator window consists of two areas: the Preview panel and Content area.

Preview Panel – Displays outline or thumbnail images of sections and questions; allows you to select a question type and create new questions.

Content Area – area for adding content to questions.

Preview

Content

Changing the preview panel view

You can view items in the default outline mode, which displays only item titles, or you can view the item detail, which includes a thumbnail of the question and answer.

- To switch to the detail view, select **View > Item Detail**.

Creating a new document

When you launch LearningCheck™ Creator, a blank document opens, with the first section open in the Content area. You can add questions to this document and save it to create a new document.

If you are working in a document, and want to create a new one (if, for instance you want to copy questions from the open document to a new one) do the following:

- ▶ Click **File > New** or click .

A new document opens, with the first section open in the Content area.

Specifying document properties

Document properties allow you to store data with your documents that can be used to specify certain properties for use on the device. Document properties can also be used as search criteria when searching for questions relating to particular topics or keywords. You can specify the following properties for your LearningCheck documents:

Title

Properties

- Author Name
- Grade Level
- Document type
- Copyright information

Item defaults

- Default topic
- Default keywords

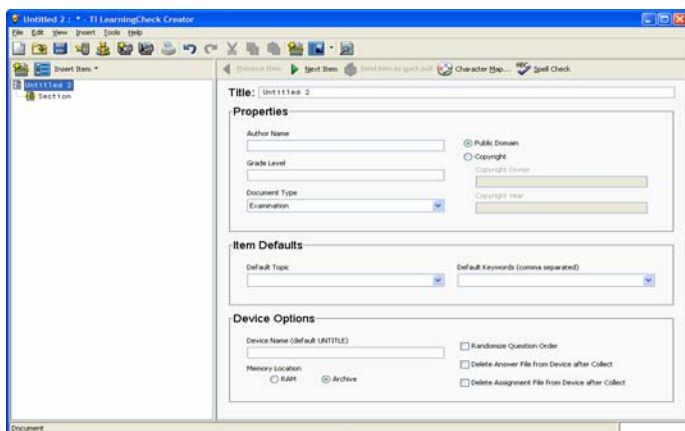

Device Options

- Device Name
- Memory Location (RAM or archive)
- Randomize question order
- Delete Answer file from device after collect
- Delete Assignment file from device after collect

To change document properties

1. In the Preview panel, click  Untitled 1 .

The document properties page displays.

2. Type a name for the document in the Document Title box. This name will display in the calculator's Assignment List.
3. Select a document type (Examination or Self-check) from the document type dropdown.
4. If you want to add or change any other information about the document, click the desired entry field and type the information in the box.

You are now ready to create sections and questions for the document.

Adding a new section

To add a new section to the document

1. In the Preview pane, click  .
2. Click  **Section**.
LearningCheck™ Creator adds a new section.
3. Type a title for the new section in the Title box. (If you do not designate a title, it is named *Section*.)
You can give the same title to more than one section.

You can rename the sections later if you prefer.

4. If you want to include a section description, type it in the Text area.
5. If you want to include an image, click Browse in the Image area, and navigate to the location of the image file. Double-click the image file name.

The image appears in the Image area of the dialog box. You can edit the image using the toolbar below.

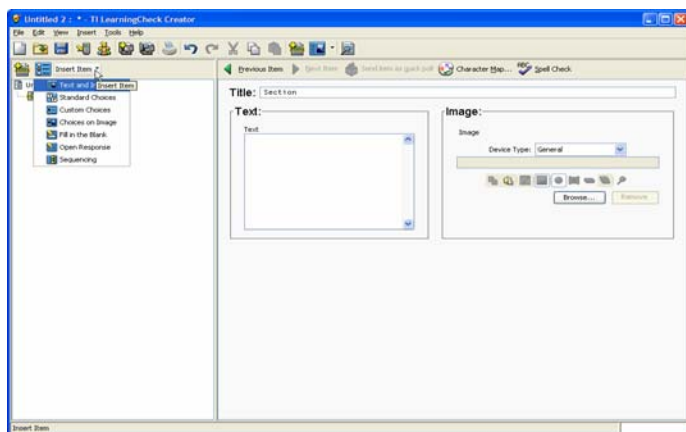

Adding questions

You can include several types of questions in LearningCheck Creator documents. To see the specifics of each question type, refer to the following:

- Adding a new choices on image question
- Adding a new custom choices question
- Adding a new fill in the blank question
- Adding a new open response question
- Adding a new sequencing question
- Adding a new standard choices question
- Adding a new text and image item
- Adding questions from the Item Bank

Adding a question

1. In the Preview pane, click the **Insert Item** drop-down button.

2. Click to select the type of question you want to add.
The content panel for the new question displays.
3. Type the topic of the question in the **Topic** field.
4. Type any keywords that relate to the question in the **Keyword** field.

Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.

5. Type a title for the question in the Title box. (If you do not designate a title, the default title is Item.)

If you do not name questions, they are numbered sequentially in the document.

You can rename the questions later if you prefer.

6. Type the question text and complete the other fields as required.

Adding specific question types

Adding a new choices on image question

A choices on image question is one in which the student views an image and selects the answer from one of the points on the image.

Example: The student might be presented an image of the state of Texas and asked to identify which of three points on the image showed the location of the capital city, Austin.

To add a new choices on image question to a section

1. In the Preview pane, click the Insert Item dropdown, and select  **Choices on Image**.

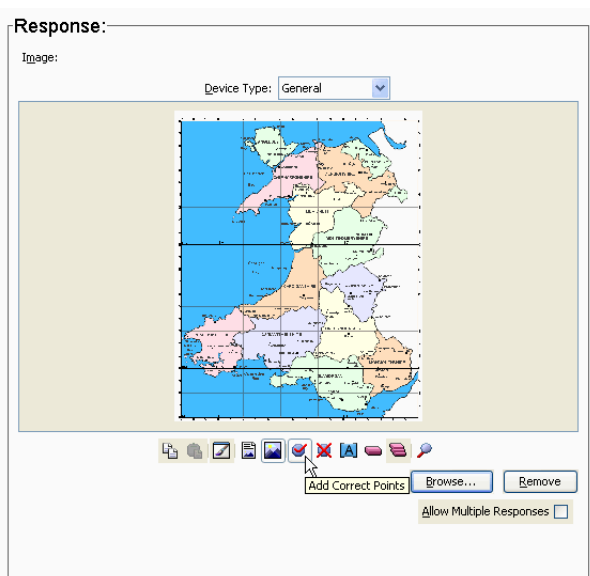

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.

Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.

4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. In the Response area, click **Browse**, navigate to the image and Insert it into the template.

The image appears in the Image area of the dialog box.

7. To add points to the image, click on the image toolbar, and move the cursor to the point on the image. Click to add the point.
8. To add the correct answer point to the image, click  on the image toolbar, and then click the correct location on the image.

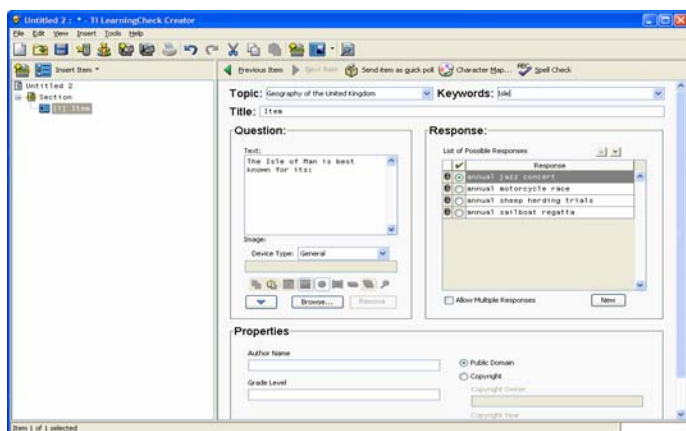

9. To create additional answer choices, click  and then click other locations on the image.
10. To apply labels to the points, click  on the image toolbar and then click on each point.

The points are labeled **A**, **B**, **C**, etc. in the order in which you click on them.

- a) To move a point (and its label) to a different place on the image, click the point and drag it to the new place.

Adding a new custom choices question

1. In the Preview pane, click the Insert Item dropdown, and select **Custom Choices**. 

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.

Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.

4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. If the question will include an image, insert the image into the Image area.

The image appears in the Image area of the dialog box.

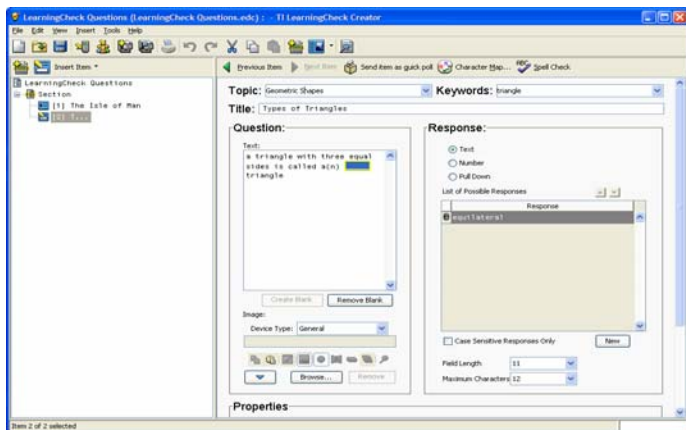

7. To create answer choices, click in the Response box and type the first response.
8. To enter the second response, click **New**, and then type the response in the next box.
9. Repeat to create additional responses.
10. To delete a response, click  at the left of the response.
11. To change the order of the responses, select the response you wish to

move and then click  or  to move the response up or down in the list.

12. In the List of Possible Responses, click the button at the left of the correct response. If this question has more than one correct response, click the **Allow Multiple Responses** checkbox, and then click the correct answers.

Adding a new fill in the blank question

1. In the Preview pane, click the Insert Item dropdown, and select  **Fill in the Blank**.

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.

Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.

4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. Create the blank. There are two ways to do this:

- a) Type the question, including the text that is in the blank (the answer)—don't type a blank.
- b) Select the text that will be in the blank.
- c) Click **Create Blank**.

The LearningCheck™ Creator places the answer in the Question Text box with a frame around it and displays the text in the List of Possible Responses.

or

- d) Type the question leaving out the answer—don't type a blank.
- e) Click the place you wish to put the blank and then click **Create Blank**.
- f) Type the answer in the Response Text box.

The LearningCheck™ Creator places the answer in the Question Text box with a frame around it and displays the text in the List of Possible Responses.

- 7. To remove a blank, click the blank and then click **Remove Blank**.
- 8. Click the type of Response (Text, Number, or Pull Down).

For text responses, the **Text** button is automatically selected and the number of characters contained in the word you placed in the blank is automatically entered into Field Length and Maximum Characters.

For numeric responses, click the **Number** button.

To create a pull-down list of responses, click the **Pull Down** button.

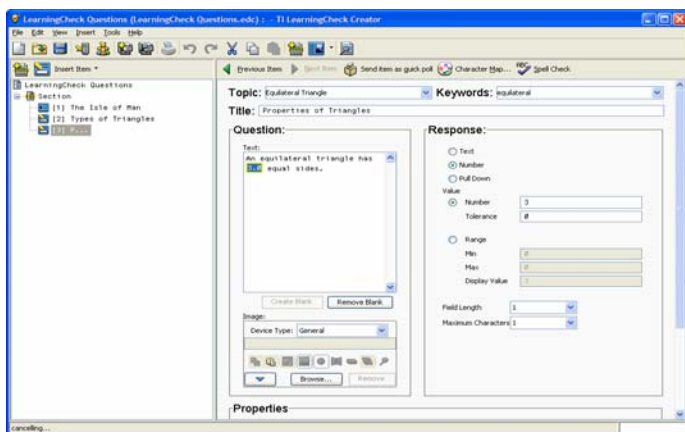

If you want to make the blank longer so that the size of the blank does not reveal the answer, change Field Length to a larger number.

- 9. If the question will include an image, insert the image into the Image area.

Creating a question with a numeric blank

1. Create a fill in the blank question and complete steps 1 through 4c.
2. In the Response area, click **Number**.

The lower portion of the dialog box changes to reveal boxes for Number Tolerance and Range.

The screenshot shows the 'LearningCheck Questions' dialog box in the 'TI LearningCheck Creator' application. The 'Topic' is 'Equilateral Triangle' and the 'Keywords' are 'equilateral'. The 'Title' is 'Properties of Triangles'. The 'Question' text is 'An equilateral triangle has equal sides.' The 'Response' area has 'Number' selected. The 'Value' field is '3', 'Tolerance' is '0', 'Range' is '25 to 27', 'Min' is '25', 'Max' is '27', and 'Display Value' is '3'. The 'Field Length' is '1' and 'Maximum Characters' is '1'. The 'Properties' section is at the bottom.

Tolerance and *Range* are very similar, but your choice between these two fields will probably be based on which one is easier to specify. For example, if the question is "The value of pi is ____" you might specify 3.14159265 as the correct answer with a Tolerance of .01. If the response to your question is a range of integers, then using Range (25 to 27, for example) might be easier.

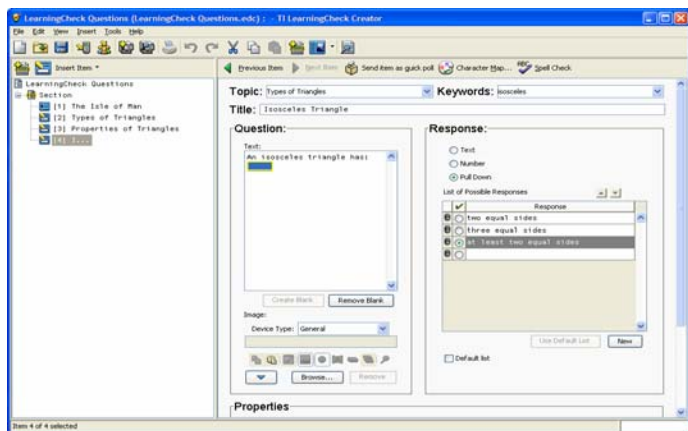

3. If more than one value is acceptable for the answer, enter a Tolerance, or enter Range in the Minimum Value and Maximum Value boxes.

If you want to make the blank longer so that the size of the blank does not reveal the answer, change Field Length to a larger number.

Creating a question with a pull-down blank

1. Create a fill in the blank question and complete steps 1 through 4c.
2. In the Response area, click **Pull Down**.

The text you selected for the blank appears in the List of Possible Responses.

- To add additional responses to the pull-down list, click **New**, and then type the response in the next box.

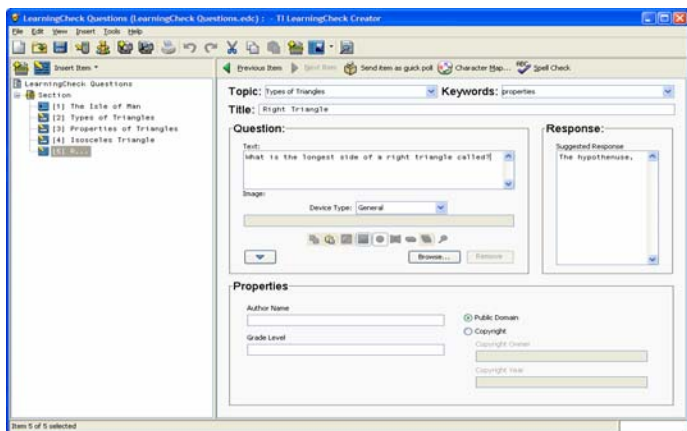

Note: To delete a response click  at the left of the response.

- In the List of Possible Responses, click the button at the left of the correct response.
- If this question includes multiple blanks and you want to use the same list for more than one blank, make the list a default list. Click **Default List**.
- To use a previously created default list, create the blank and then click **Use Default List**.

The list appears in the List of Possible Responses.

Adding a new open response question

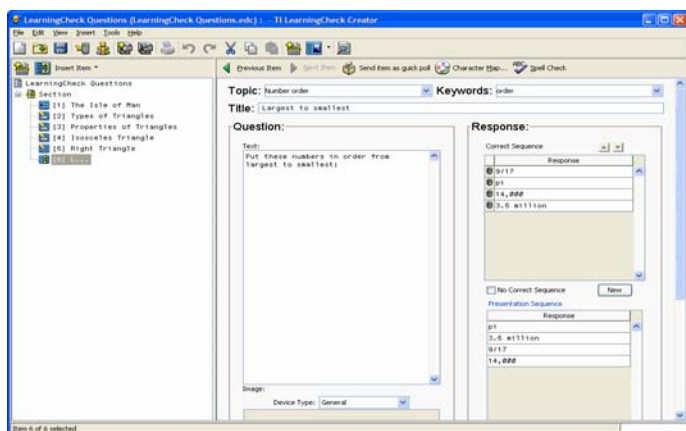

- In the Preview pane, click the Insert Item dropdown, and select **Open Response**. 

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.
Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.
4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. If the question will include an image, insert or copy the image into the Image area.
7. If you want to specify a Suggested Response, type it in the box.

Adding a new sequencing question

1. In the Preview pane, click the Insert Item dropdown, and select **Sequencing**. 

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.
Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.
4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. If the question will include an image, insert or copy the image into the Image area.
7. To create answer choices, click in the Response box and type the first response.
8. To enter additional responses, click **New**, and then type the response in the next box. (After you enter all of the responses, you will indicate the correct sequence.)

Note: To remove a response, click  at the left of the response.

9. To specify the correct sequence, click the response you wish to move and then click  or  to move the response up or down the list.

Note: If more than one sequence is acceptable, click **No Correct Sequence**.

10. Click **Generate Presentation Sequence**. The responses appear in random order in the **Presentation Sequence** box.

11. To change the presentation sequence, click the response you wish to move and then click  or  to move the response up or down the list.

Editing Presentation Sequence

When creating a sequencing question, you must click **Generate Presentation Sequence** to copy the answers from the Correct Sequence box into the Presentation Sequence box.

After the presentation sequence is generated:

- Clicking **New** adds a new response to the Correct Sequence box, but you must click **Generate Presentation Sequence** to copy it into the Presentation Sequence box.
- Clicking  at the left of a response deletes the response from both boxes.
- Correcting a response in the Correct Sequence box also corrects it in the Presentation Sequence box (when you finish making the change).

If you add an answer to the Correct Sequence box and then close the question without generating the presentation sequence again, the number of answers in the Correct Sequence box will be different from the number of answers in the Presentation Sequence box. The LearningCheck™ Creator will automatically update and reorder the answers in the Presentation Sequence box.

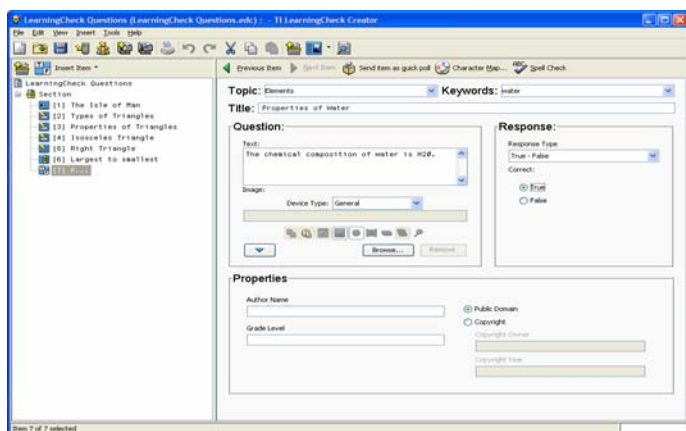

Adding a new standard choices question

The standard choices question includes the following question types:

- True-False
- Yes-No
- Right-Wrong
- Agree-Disagree
- Always-Sometimes-Never
- Strongly Disagree-Somewhat Disagree-Neutral-Somewhat Agree-Strongly Agree

To add a new standard choices question to a section

1. In the Preview pane, click the Insert Item dropdown, and select  **Standard Choices**.

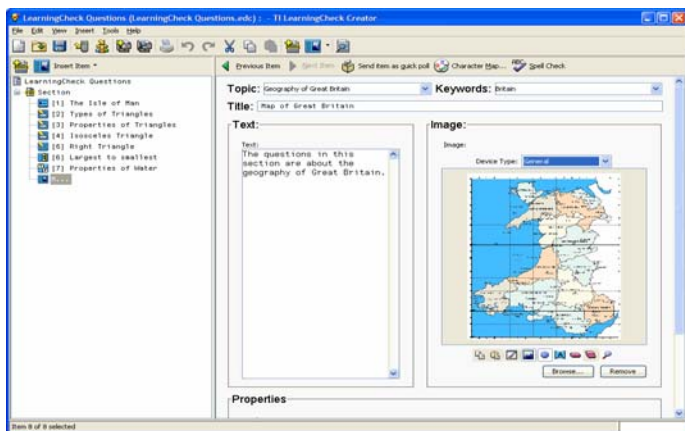

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.
Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.
4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. If the question will include an image, insert or copy the image into the Image area.
7. In the Response drop-down list, click the response type.
8. Click the button at the left of the correct response for the question.

Adding a new text and image item

The Text and Image item does not require a response, so you might use this for such things as instructions or questions for essay or classroom discussion.

To add a new text and image item to a section

1. In the Preview pane, click the Insert Item dropdown, and select  **Text and Image**.

2. Type the topic of the question in the **Topic** field.
3. Type any keywords that relate to the question in the **Keyword** field.
Note: The Topic and Keyword information is used by the Item bank to provide search criteria for finding questions. You must enter text in these fields for the question to be searchable in the item bank.
4. Type a title for the question in the **Title** box.
5. Type the question in **Text** box.
6. If the item will include an image, insert or copy the image into the Image area.

Saving a document

To save a new document

1. Click **File > Save** or click .
2. If you haven't entered a title for the document, LearningCheck™ Creator prompts you to enter a title. (This title will display in the handheld device's Assignment List.)

If you do not want to see this dialog box each time you save an unnamed document, click **Do not show this again**.

- Type in a name for the document and click **OK**.
or
- Do not type in a name and click **Cancel**.

The Save As dialog box opens.

3. Browse to the folder where you want to save the file. LearningCheck™ Creator suggests a filename the same as the document name (if you entered one).
4. Click **Save** to accept the suggested filename or type in a new filename and click **Save**.

If you do not enter a title for the document but do enter a name for the file, LearningCheck™ Creator changes the document title to the same as the filename.

To save an existing document

- Click **File > Save** or click .

Related Topics

You can also save a document with a new name. (See “Saving with a new name” on page 32.)

You can use **Save As** to create a new folder and save a document into it at the same time. (See “Creating a new folder” on page 33.)

When you edit a document from a zipped file (.TIP, .TIG, .ZIP), you *cannot* save the changes in the zipped file. You must save the document to a different location. (See “Editing a document in a zipped file” on page 28.)

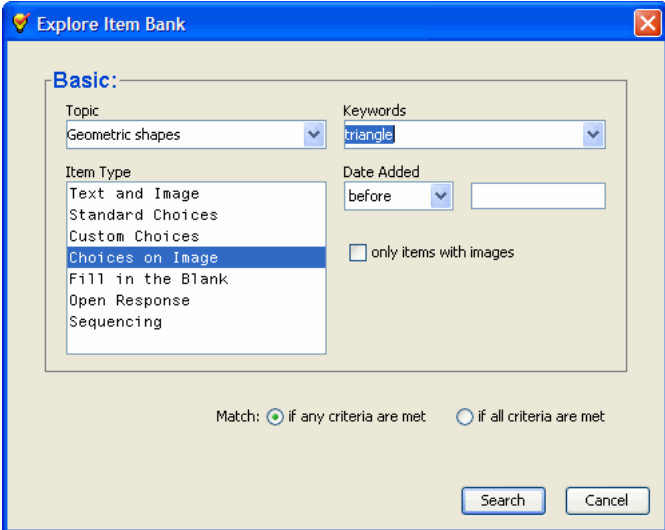

Adding questions from the Item Bank

The Item Bank stores questions from the LearningCheck documents you create, so you can re-use them. The Item Bank builds a list of topics and keywords based on the topics and keywords you assign to questions when you create them. You can find questions from previous documents using search criteria, and add them to your current document using the Item Bank. The questions are not removed from the earlier document, but are copied into the new document when you select and copy them from the Item Bank.

To locate a question in the Item Bank

1. Click **File > Open Item Bank** or click .

The Explore Item Bank dialog box displays.

The "Explore Item Bank" dialog box is shown. It has a title bar with a yellow lightbulb icon and a red close button. The main area is titled "Basic:" and contains several search criteria fields. The "Topic" dropdown is set to "Geometric shapes". The "Keywords" dropdown is set to "triangle". The "Item Type" list has "Choices on Image" selected. The "Date Added" dropdown is set to "before" with an empty text field next to it. There is an unchecked checkbox labeled "only items with images". At the bottom, there is a "Match:" section with two radio buttons: "if any criteria are met" (which is selected) and "if all criteria are met". At the very bottom are "Search" and "Cancel" buttons.

2. Use the **Topic** and **Keywords** dropdown menus to select terms to use to search for the question you want to find.
3. If you know the type of question, click to select it in the **Item Type** field.
4. If you know when the question was created, you can use the **Date Added** dropdown to specify a date, and whether the question was created before, after or on the date that you type in the field next to the dropdown.

Note: Dates must be entered in the form of mm/dd/yy.

5. Check the box next to **only items with images** to add that to the search criteria.
6. Click to select whether the search should return items if some criteria are met, or only if all criteria are met.
7. Click **Search**.

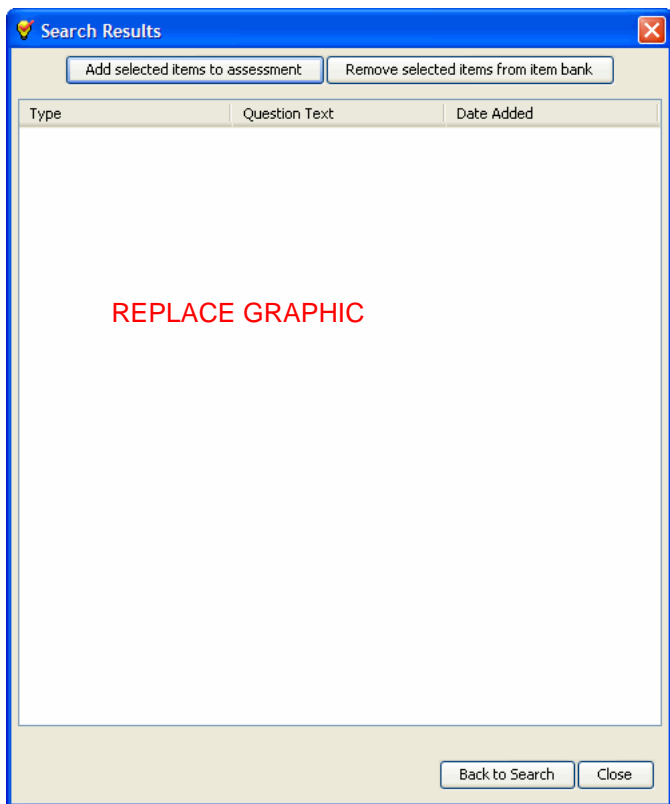

The Item Bank returns a list of the items which meet the conditions you specified.

Note: If the search does not return any results, click **Back to Search** and modify the criteria to try the search again.

Adding Selected Items to Assessment

1. Scroll through the list of questions to locate the one you wish to add to your document.
2. Click **Add selected items to assessment**.

The item(s) is added to your document.

To close the Item Bank

- Click **File > Close Item Bank** or click .

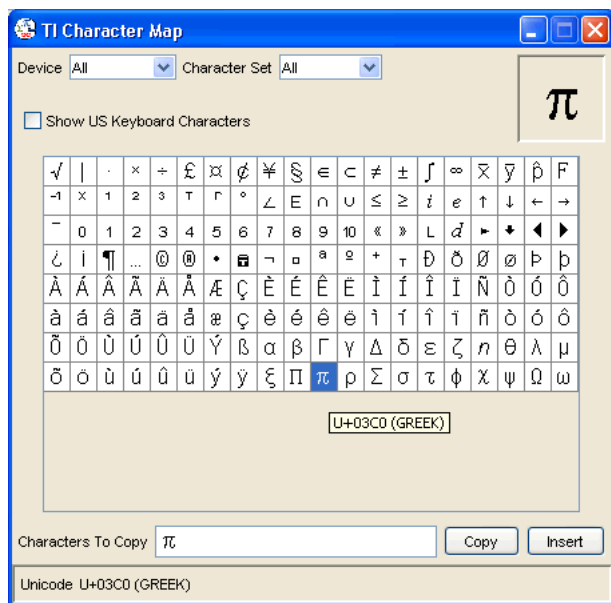

The Item Bank closes. If more than one Item Bank is open, the Item Bank that is in front closes.

Adding special characters to text

The TI Character Map allows you to insert symbols, punctuation, math symbols, special language characters, or TI-specific characters into text. You can add special characters to LearningCheck™ Creator questions, Class Analysis cells, and Transfer List application variable (AppVar) names.

To insert a character

1. Click to place the cursor in the text where you want to add the character(s).
2. Click .

3. Select the Device (All, Common, TI-83 Plus, TI-84 Plus Family, TI-89 Family, TI-92 Plus, or Voyage™ 200) from the drop-down list.
4. Select the Character Set (All, Math, Punctuation, Symbol, Greek, French, German, or Spanish) from the drop-down list.
5. Click **Show US Keyboard Characters** if you want to see all of the letters and other characters from a standard U.S. keyboard
6. Click the character you want to add.

The character displays in the Characters To Copy box.

7. Click **Insert** to place the character into the text, or click **Copy** to copy the character to the clipboard, and then paste the character into the text.

You can also select several characters and insert or copy them all at the same time.

8. Click the Window Close button to close the window.

When added to LearningCheck™ Creator documents, characters shown in gray on the character map may not display correctly on all devices. For example, the square root symbol may display as **_sqrt_**, or a character may look slightly different. Use Preview to see how the character is displayed.

In addition, Unicode characters not in the character map can be inserted into question text but will display as invalid characters (□) on the devices.

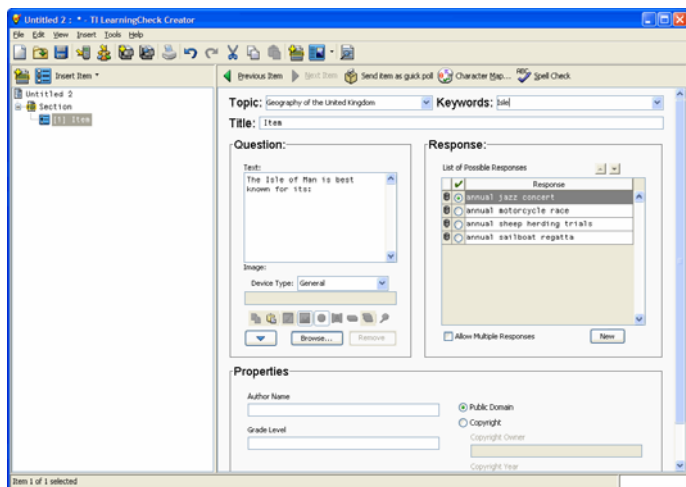

Adding topics and keywords

Topics and Keywords are used to search for questions or documents on a specific topic. You may add topics and keywords to any question or item.

When you add a topic or keyword to a question, that keyword is also added to the List of Topics and Keywords for the section that includes the question and the document that includes the question. (You cannot enter keywords directly into a section or document list.)

To add topics or keywords to a question

1. Double-click the question title in the preview pane to open the question.

2. Type the topic or keyword in the dropdown field, or use the dropdown menu to select an existing topic or keyword.

Note: To enter multiple keywords, separate them with a comma.

3. When the topic and keywords have been added, click **OK**.

Opening existing documents

The LearningCheck™ Creator lets you open one or more .EDC documents. In addition, you can open any .EDC file from Windows® Explorer by double-clicking the filename or icon.

You can also see the files in a zipped file (.TIP, .TIG, or .ZIP) and open a document from the zipped file without first unzipping the file. (See “Editing a document in a zipped file” on page 28.)

To open an existing document

1. Click **File > Open** or click .
2. Select the document's profile in the User Profile Selection dialog box.

If you always use the same profile and do not want to see this dialog box each time you open a document, click **Do not show this again**. The next time you open a document, the User Profile Selection dialog box will not open. (However, this option is not available if you are using the *guest* profile.)

3. If necessary, navigate to the folder that contains your documents.
 - If you have set a default directory in your User Profile, the Open dialog box shows the directory.
 - If you have not set a default directory, the Open dialog box shows the directory of the last document you opened.
4. Click the document name(s).
5. Click **Open**.

The document(s) opens.

You can also open any document created by LearningCheck™ Creator (an .EDC file) by double-clicking on the file icon.

Adding a new question

To add a new question (or item) to a section

1. Click to highlight the section name.
2. Insert the new question using one of the methods described below:
 - Click **Insert > Item** and then click the question type and template you want.or
 - Click the question template icon.
3. Double-click to open the question.
4. Complete the dialog box for the question type you created. For additional information about specific items, click the appropriate cross-reference listed below.
5. Click **OK**.

Editing a question

To edit an existing question

1. Double-click the question to open it.
2. To change text, highlight the text you wish to change and type the new text over it.
3. To delete text, highlight the text and press the **Delete** key on your computer keyboard.
4. Click **OK**.

Editing a document in a zipped file

The LearningCheck™ Creator lets you see the files in a zipped file (.TIP, .TIG, or .ZIP) and open a document from the zipped file. It is not necessary to unzip the file before you open the document.

To open a document in a zipped file

1. Click **File > Open** or click .
2. In the Open dialog box, navigate to the folder that contains the file.
3. Click the filename.
4. Click **Open**.

The zipped file opens. You can see the documents in the zipped file.

5. Click the document name.
6. Click **Open**.

The document opens ready for editing in LearningCheck™ Creator.

You can also select and open images from the zipped file.

To save a document from a zipped file

When you edit a document from a zipped file, you *cannot* save the changes in the zipped file. You must save the document to a different location.

1. Click **File > Save As** or click .
2. In the Save As dialog box, navigate to the location where you want to save the document.
3. Type a new name for the document in the File name box.
4. Click **Save**.

Checking spelling for the document

You can check spelling for a question, a section, or an entire document.

To check spelling from the main window

1. In the Navigation pane or the Content pane, click the question, section, or document.
2. Click **Tools > Spell Check** or click .
3. Respond to the spell check messages as necessary.

To check spelling with a question open

1. Click **Tools > Spell Check** or click .
2. To check only the Question tab, click **Current Tab**.
or

To spell check the Question, Properties, Hint & Feedback, Keywords, and Copyright information, click **All Tabs**.

3. Respond to the spell check messages as necessary.

Cutting, copying, and pasting questions or sections

If you are accustomed to cutting, copying, and pasting in Windows®, you will find the cut, copy, and paste functions in the LearningCheck™ Creator familiar. You can cut, copy, or paste a question, a section, or an image.

In addition, you can open multiple documents in LearningCheck™ Creator and then copy and paste images from one document into another.

To cut a question, section or image

1. Click the question, section, or image.
2. Click **Edit > Cut** or click .

To copy a question, section, or image

1. Click the question, section, or image.

2. Click **Edit > Copy** or click .

To select multiple consecutive items for copying, hold **Shift** while selecting. To select multiple items that are not consecutive, hold **Ctrl** while selecting.

To paste a question or section

1. Click the question or section immediately above the location to which you want to paste.
2. Click **Edit > Paste** or click .

To paste an image

1. Click the image area of the question into which you want to paste the image.

Click **Edit > Paste** or click .

You can also use the standard keyboard shortcut keys for these operations (**Ctrl + X** to cut, **Ctrl + C** to copy, or **Ctrl + V** to paste).

To copy text from Microsoft® Word into a LearningCheck™ Creator question

1. In the Microsoft® Word document, select the text that you want to copy.
2. Click **Edit > Copy** or click .
3. Go to the LearningCheck™ Creator.
4. Open the question to which you want to paste text.
5. Click to place the cursor in the text box.

Click **Edit > Paste** or click .

There is a 64K limit on text pasted into a LearningCheck™ Creator document.

Moving a section or a question

You can use drag-and-drop to move one or more sections in your LearningCheck™ Creator document. You can also move one or more questions within a section or move them to a different section.

To move a section

1. In the Navigation pane, click the section to be moved.
To move more than one section at a time, Shift + click each section.
2. Drag the section up or down to place it in the new location. A positioning line shows where the section will appear.
Sections that are moved will automatically renumber themselves.

To move a question within a section

1. Click the question to be moved.
To move more than one question at a time, Shift + click each question.
2. Drag the question up or down to place it in the new location. A positioning line shows where the question will appear.
Questions that are moved will automatically renumber themselves.

To move a question to another section

1. Click the question to be moved.
To move more than one question at a time, Shift + click each question.
2. Drag the question left into the Navigation pane to place it in the new section. A positioning line shows where the question will appear.
Questions that are moved will automatically renumber themselves.

Deleting a section or a question

To delete a section

1. In the Navigation pane, select the section to be deleted.
2. Click **Edit > Delete** or click .

To delete a question

1. In the Navigation pane or the Content pane, select the question to be deleted.

2. Click **Edit > Delete** or click .

Renaming a section or a question

You may create documents using the default section and question titles (*Section 1* or *Item 1*), but you may find it easier to organize topics and questions if you assign section and question names that describe the topic.

To rename a section or a question

1. Right-click the section name or question name.
2. On the shortcut menu, click **Rename**.
3. Type the new name for the section or question.

Press **Enter**.

You can give identical titles to more than one question or section.

Deleting a document

You must delete a document using Windows® Explorer. The file that you are deleting must not be open.

To delete a document

1. Open Windows® Explorer.
2. Navigate to the folder that contains the file.
3. Click the file.
4. Click **Edit > Delete** or click .

Saving with a new name

You can copy a document by saving it with a new name.

To save the current document with a new name

1. Click **File > Save As** or click . (For a new document, **Save** works the same as **Save As**.)
2. In the Save As dialog box, navigate to the folder to which you want to save the document and type a new name for that file.

Click **Save**.

You may want to save changes to the original document before using **Save As**. Otherwise, changes are saved in the copy but not the original.

Creating a new folder

You can use **Save As** to create a new folder (and save a document into it at the same time).

To create a new folder

1. Open the document you want to save.
2. Click **File > Save As** or click . (For a new document, **Save** works the same as **Save As**.)
3. If you haven't entered a title for the document, LearningCheck™ Creator prompts you to enter a title. (This title will display in the handheld device's Assignment List.)

If you do not want to see this dialog box each time you save an unnamed document, click **Do not show this again**.

- Type in a name for the document and click **OK**.

or

- Do not type in a name and click **Cancel**.

The Save As dialog box opens.

4. Browse to the folder where you want to save the file.

If you do not navigate to another location, the New Folder will be created in the Document Directory location shown in your User Profile General tab.

5. Click .

A folder named *New Folder* is created.

6. To rename the folder, click to select it and then click it again.
7. Type a new name for the folder and click **Open**.
8. LearningCheck™ Creator suggests a filename for the document that is the same as the document name (if you entered one).

9. Click **Save** to accept the suggested document filename or type in a new filename and click **Save**.

If you do not enter a title for the document but do enter a name for the file, LearningCheck™ Creator changes the document title to the same as the filename.

Using Undo and Redo

If you have worked with other Windows® programs, you are probably familiar with the Undo and Redo commands. Use Undo to undo the last action, and Redo to reverse an Undo command.

With the LearningCheck™ Creator, the actions that you can undo depend on whether you are working with text or objects. The number of actions that you may undo is limited only by the memory available on your computer.

To undo an action

- Click **Edit > Undo** or click .

To redo an action

- Click **Edit > Redo** or click .

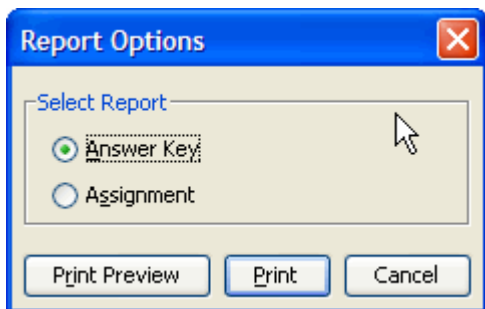

Printing a Report

Use the Report Options dialog box to preview and print a document report. Four types of reports are available:

- **Answer Key** prints the items, choices and correct answer.
- **Assignment** prints the items and choices.

To print a report

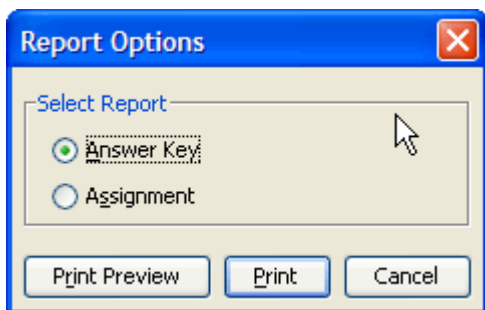

1. Click **File > Print** or click .

2. Select the type of report you want to print.
3. Click **Print**.

Preview paper version of assignment

1. Click **File > Print** or click .

2. Select the type of report you want to preview.
3. Click **Print Preview** to see how the report will look.
4. Click  to print the report.
or
Click **Close** to return to the Report Options window.

Working with Images

This section describes basic procedures you will use to insert and edit images in a document.

- Image toolbar
- Adding an image to a question
- Scaling and cropping an image
- Adding a point or label
- Changing a point or label
- Deleting a point or label
- Editing an image

Image toolbar

The Image toolbar appears below the Image area in each question template.

The Image toolbar changes slightly depending on the type of question and the actions you need to take, but all of the icons are shown in the following table.

Icon	Name
 or 	Expand or Collapse image area

Icon	Name
	Copy Image to Clipboard
	Paste Image from Clipboard
	Edit Image
 or 	Position Image Above/Below Text
 or 	Scale/Crop Image for Display on Device
	Add Points to Image
	Add Correct Points
	Add Incorrect Points
	Add Labels to Existing Points
	Erase Existing Points/Labels
	Clear all Points/Labels
	Zoom Image In/Out for Preview

Adding an image to a question

The LearningCheck™ Creator supports the following graphic image formats:

- Portable Network Graphics (.PNG)
- Windows bitmaps (.BMP) *except* compressed bitmaps
- Joint Photography Experts Group images (.JPEG)
- CompuServe graphics (.GIF)
- TI-83, TI-83 Plus, and TI-83 Plus Silver Edition images (.83i, .8xi, .PIC)
- TI-84 Plus and TI-84 Plus Silver Edition images (.83i, .8xi, .PIC)
- TI-89 Family, TI-92, TI-92 Plus, and Voyage™ 200 images (.89i, .92i, .9xi, v2i)

Other image file types may work in some instances, but are not supported. When you browse for files (step 3 below), only supported image types appear.

You can add an image into any of the LearningCheck™ Creator templates by either inserting the image file or by copying and pasting the image from another document.

To insert an image

You can insert an image file into a question, section, or document template.

1. If the template window is not already open, double-click to open the question or item.
2. In the Image area of the dialog box, click **Browse**.
3. Navigate to the folder where the image is stored, select the image, and click **Open**.

The image opens in the Image area of the dialog box and activates the image toolbar.

4. If necessary, click the image position icon to indicate whether the image should be below the text or above the text.
 -  Places the image after the question text. This is the default choice.
 -  Places the image before the question text

If you usually want the same image position, you can set it on your User Profile General tab. However, you can always change the image position in any question.

5. To add points and/or labels to the image, follow the instructions for the specific type of question.

To copy and paste an image

You can paste an image from the clipboard or copy and paste an image from any open document into a question, section, or document template.

1. If the template window is not already open, double-click to open the question or item.
2. Open the document from which you want to copy the image.
3. Click the image and then click **Edit > Copy** or click .

4. Click the image area of the question into which you want to paste the image.
5. Click **Edit > Paste** or click .
6. If necessary, click the image position icon to indicate whether the image should be below the text or above the text.
 -  Places the image after the question text. This is the default choice.
 -  Places the image before the question text

If you usually want the same image position, you can set it on your User Profile General tab. However, you can always change the image position in any question.

After you insert the image, you can place points and/or labels on the image. You can also open MS Paint and edit the image.

Scaling and cropping an image

To scale and/or crop an image

1. Click the appropriate icon to scale the image or to scale the image and then crop it to fit the device screen.
 -  Scales down the image (and any points and/or labels) to fit the device screen. This is the default choice.
 -  Scales down the image and then crops it to fit the device screen. To make sure the viewable area includes the part of the image you want, preview the cropped image. (Cropping is necessary *only* when using captured device screens as images.)
2. To preview the image for the intended device, select the Device Type from the pulldown list (General, TI-83 Plus Family, TI-84 Plus Family, TI-89 Family, TI-92 Plus, or Voyage™ 200).

Scaling and cropping apply only to the image sent to the device. The image saved in the edc file remains the original size.

Adding a point or label

You can add points to an image and label the points. The point tool lets you create points on any image. However, for a choices on image question, use the correct and incorrect point tools.

To add a point to an image

1. Open the question, section, or document that contains the image.
The image opens in the Image area of the dialog box.
2. On the image toolbar, click  and then click the location of the point on the image. Repeat to create additional points.
or
For a choices on image question, click  and then click the correct location on the image.
To create additional points, click  and then click other locations on the image.
3. To apply labels to the points, click  and then click on each point.
The points are labeled **A**, **B**, **C**, and so on in the order in which you click them.
4. To move a point (and its label) to a different place on the image, click the point and drag it to the new location.

Changing a point label

You can change a point label by editing the label or by erasing and recreating the label.

To edit a point label

1. On the image toolbar, click .
2. Click the point or the point label you wish to edit.
The label is highlighted.
3. Type a new label. Be sure to use uppercase letters.
4. Press **Enter**.

To erase a point label

1. On the image toolbar, click .
2. Click the label that you want to erase.
The label is removed. You can now add a new label.

Deleting a point or label

You can delete a single point or label from an image or delete all the points and labels at once.

To delete a single point on an image

1. On the image toolbar, click .
2. On the image, click the point that you want to delete.

To delete a single label on an image

1. On the image toolbar, click .
2. On the image, click the label that you want to delete.

To delete all points and labels on an image

- On the image toolbar, click .

The image remains, but all points and labels are erased.

Editing an image

The LearningCheck™ Creator allows you to open Microsoft® Paint and edit the image in a question, section, or document template.

To open the image editor

- On the image toolbar, click .

Microsoft® Paint opens with the image file ready for editing.

To put the edited image back into the template

Saving the image in Microsoft® Paint does not change the image in the template image area. You must select the edited image and then copy and paste it into the question, section, or document template.

1. Click **Edit > Select All**.
2. Click **Edit > Copy**.
3. Click the image area into which you want to paste the image.
4. Click **Edit > Paste** or click .

To save the edited image

1. Click **Edit > Select All**.
2. Click **File > Save**.

3. Type in a name for the image file and click **OK**.

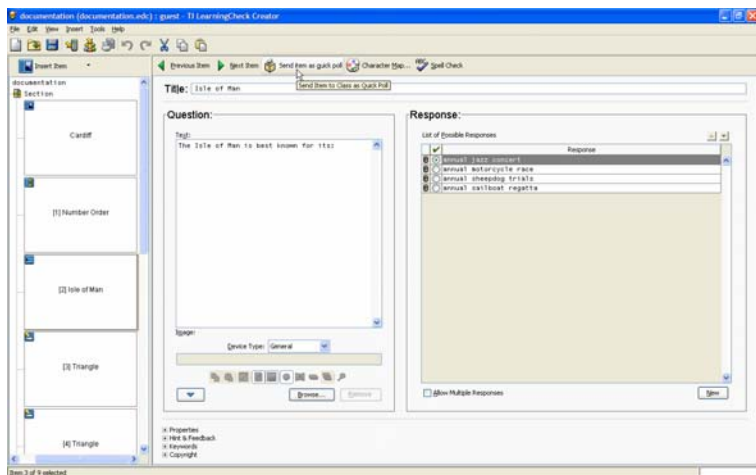

Saving the image in Microsoft® Paint does not change the image in the image area. You must copy and paste the edited image into the question, section, or document template.

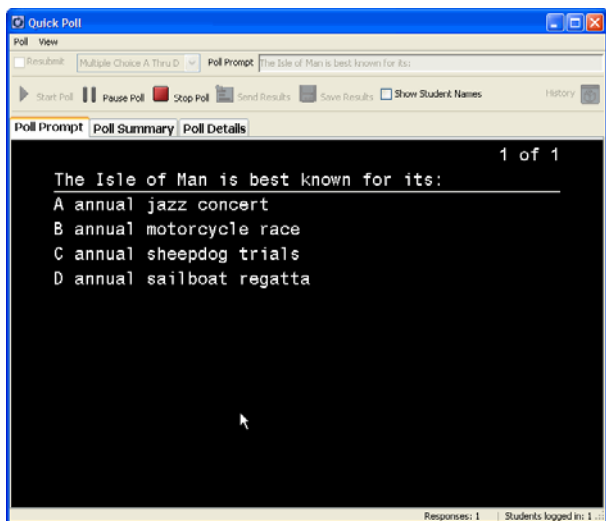

Sending a LearningCheck Creator item as a Quick Poll

You can send a LearningCheck Creator question to your class as a Quick Poll. The TI-Navigator network must be available, and the class must be started.

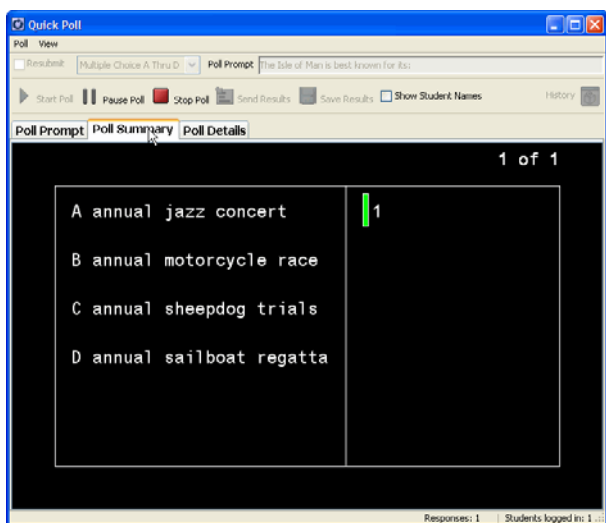

1. Open the question you want to send as a Quick Poll.
2. Click **Send item as Quick Poll**.

The question is sent to the class as a Quick Poll, and the Quick Poll tool window opens on your computer.

- Click the **Poll Summary** tab to see student responses.

You can save this poll, and view the results just as you would any Quick Poll item. For more information about Quick Poll items, see The Quick Poll tool window and tabs.

Sending documents to calculators

This section describes basic procedures you will use to send a document to a calculator. You can send a document to a single device or you can send a document to all the devices in a classroom network.

- Checking AppVar size
- Sending a document to a calculator
- Sending a document to a classroom network

Previewing a document

You can use the LearningCheck™ Creator preview to see how a question, section, or document will look on a TI handheld device. The Preview window display will look and behave like the TI handheld device that you select.

You should save your document before previewing.

To preview a document

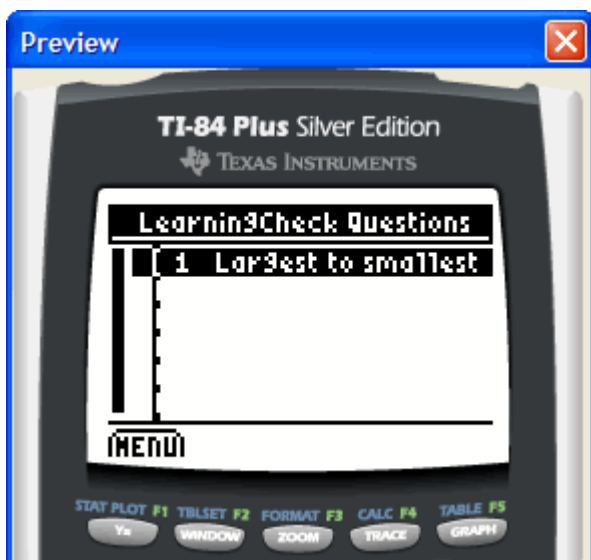

1. To view the entire document, click **Tools > Preview > Preview All**

or click .

or

To view selected questions or sections, click the questions or sections and then click **Tools > Preview > Preview Selected** or click .

The question, section, or document opens in a window similar to the device screen.

2. Use the PC keyboard and your mouse to simulate viewing the document on the device.
 - To select from a list or menu, press  or  to highlight the option you want, then click **ENTER**.
 - To see the rest of a question or response that is too large for the screen, press  or  to scroll through the text.
 - To press a soft key (**MENU**, **TAB**, **NEXT**, **BACK**) press the corresponding function key (**F2**, **F3**, **F4**, and so on) on your computer keyboard.
3. When you finish previewing the document you can close the Preview window, or, if you plan to preview additional documents, minimize the window.

Checking AppVar size

You can check the size of the application variable (AppVar) that will be created from the document before you send it to a TI calculator or classroom network.

To check AppVar size

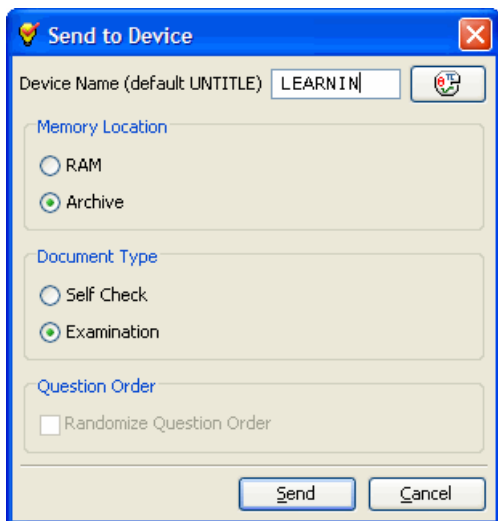

1. Click **Tools>AppVar Size** or click .
2. Click the device name (TI-83 Plus Family, TI-84 Plus Family, TI-89 Family, TI-92 Plus, Voyage™ 200, or All Devices) in the menu.
The AppVar Size box opens showing the AppVar size for the device(s) you chose.
3. When you finish viewing the information, click **Close**.

Sending a LearningCheck document to a calculator

To send the document to a TI calculator (TI-83 Plus/TI-84 Plus Families, TI-89 Family, TI-92 Plus, or Voyage™ 200 graphing handheld), you must have TI Connect™ installed and you must have a TI Connectivity Cable.

To send a document to a calculator

1. Connect one end of the TI Connectivity Cable to the appropriate port on your computer. (Connect a serial cable to the serial port; connect a USB cable to the USB port.)
 2. Connect the other end of the TI Connectivity Cable to the port on the device.
 3. In LearningCheck™ Creator, open the document that you wish to send to the device.
 4. Click **File > Send To > Send to Device** or click .
- The Send to Device dialog box opens.

5. Select whether the document should be sent to the RAM or archive memory of the device, and select the document type.
6. Click **Send**.
7. The Select TI Device dialog opens, showing a list of the ports and the devices that are connected.
8. Select the device you want and click **OK**.

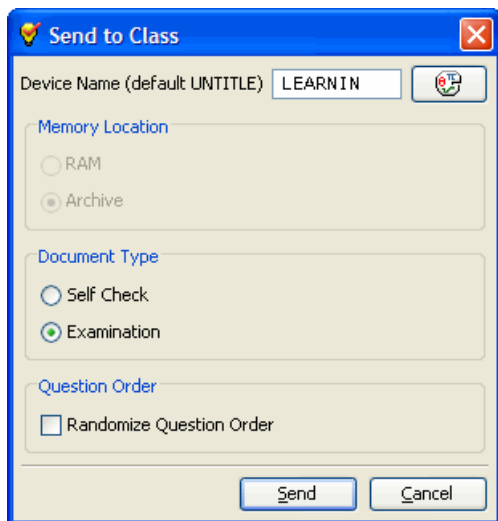

Warning: Do not disconnect a TI Connectivity cable during a transfer.

Sending a document to a classroom network

To send the document to a classroom network, your computer must be connected to the classroom network.

To send a document to a classroom network

1. In the LearningCheck™ Creator, open the document that you wish to send to the class.
2. Click **File > Send To > Send to Class** or click .
The Send to Class dialog box displays.

3. Select the document type.
4. Select **Randomize Question Order** if you want students in the class to receive the questions in a different order from one another.
5. Click **Send**.

The file is sent to the class.

Troubleshooting LearningCheck Creator

This section provides problem-solving information for the TI LearningCheck™ Creator.

- Error messages
- Troubleshooting
- Frequently-asked questions
- System requirements

Error Messages

During the normal operation of the LearningCheck™ Creator software, you may receive an information or error message. Some of the software error messages and their possible remedies are given in this section.

Documents and images:

A document must contain at least 1 section. – You tried to delete the only section in the document.

Click **OK** to close the message box. Insert a new section in the document, then delete the section you wish to remove.

File not found. – LearningCheck™ Creator cannot find the file you wish to open.

Click **OK** to close the message box. Make sure the file name is spelled correctly and that the correct directory is selected.

One or more points are partially or completely outside the image. – One or more of the points and/or labels on the image cannot be displayed on the handheld device window.

Click **OK** to close the message box. Move the points and/or labels within the image.

There was an Internal Error with Appvar conversion. LearningCheck Creator was unable to convert the document to an Appvar. –

Click **OK** to close the message box. Save the document and exit LearningCheck™ Creator. Then re-open LCC and try again.

Communication:

There was an error sending to the device. Please ensure a device is present. – LearningCheck™ Creator cannot communicate with the device.

Click **OK** to close the message box. Make sure the device is firmly connected to the computer and try again.

There was an error sending to the class. – LearningCheck™ Creator cannot communicate with the classroom network.

Click **OK** to close the message box. Make sure the network is ready and re-send the document.

Unable to print report. – LearningCheck™ Creator cannot communicate with the printer.

Click **OK** to close the message box. Make sure the printer is ready to print and try again.

Cannot send to device because TI Connect™ application is not installed. Please reinstall TI Connect™. – You selected **Send to Device**, but TI Connect™ was not installed or was incorrectly installed.

Click **OK** to close the message box. Install TI Connect™.

TI-Navigator™ <or TI Connect™> is not properly installed. Please reinstall the application. – You selected **Send to Class**, but TI-Navigator™ (or TI Connect™) was incorrectly installed.

Click **OK** to close the message box. Reinstall TI-Navigator™ (or TI Connect™).

Troubleshooting

Problem: I am running Windows® 95 and the LearningCheck™ Creator will not launch.

If you are running Windows® 95 with 16 colors, the LearningCheck™ Creator will not launch. You will see an error message "You must be running in 256 color mode or higher. You can change the color depth from the Control Panel display icon." To correct the problem:

1. Click **Start menu > Settings > Control Panel > Display**.
2. On the Settings tab, change to High Color 16 bit or 256 Colors.
3. Click **OK**.

Problem: I cannot insert a new section in my document because the Insert Section icon and menu option are greyed out.

Select either the document or another section by clicking on it, then try again. The **Insert Section** option is not available when a question is selected.

Problem: How can I save my documents to my desktop?

To save a document to your desktop:

1. Click **File > Save** or click .

The Save As dialog box opens.

2. Click **Desktop** in the Save As dialog box.
3. Click **Save** to accept the suggested filename or type in a new filename and click **Save**.

To save all of your documents to your desktop, set your user profile to show the Desktop as the Working Directory:

4. Open your user profile and go to the General tab.
5. In the Working Directory section, click  beside the Document Directory field.

6. Click **Desktop**, and then click **Select**.

All documents created with this profile will be saved as icons on your desktop.

Frequently-Asked Questions

Q: Is the LearningCheck™ Creator replacing the StudyCards™ Creator?

A: No. TI will continue to support StudyCards.

Q: Can I convert a StudyCards question set into a LearningCheck document?

A: You cannot directly convert a StudyCards™ Creator question set into a LearningCheck™ Creator document, but you can use **Copy** and **Paste** to copy the questions and answers into a LearningCheck™ Creator document. (See “Cutting, copying, and pasting questions or sections” on page 29.)

Q: Can I use the same LearningCheck™ Creator document on more than one handheld device?

A: Yes. A document created in the LearningCheck™ Creator can be made into an application variable (AppVar) for any of the supported handheld devices. (See “Sending a LearningCheck Creator item as a Quick Poll” on page 42.)

Q: How much text can I copy into a Text box?

A: There is a 64K limit on text pasted into the LearningCheck™ Creator. You should, however, consider the limitations of the device for which you are writing.

TI-Navigator™ 3.x License Agreement

The programs referenced in the TI-Navigator™ 3.x License Agreement are licensed under the terms contained in such Agreement. Additional licenses and files follow the TI-Navigator™ 3.x License Agreement.

IMPORTANT - Read this agreement ("Agreement") carefully before installing the software program(s) contained on the CD(s). The software program(s) and materials accompanying this package are licensed, not sold. Additional licenses apply and are follow this license. By installing or otherwise using the software program(s) contained on the CD(s), you agree to be bound by the terms of this license and all additional license that follow. If you do not agree with the terms of this license or any of the additional licenses that follow, return this package with all its contents to the place of purchase for a full refund.

The TI-Navigator™ 3.x license grants set forth below apply to the following TI software programs

acx_core.o dbus kernel module charger kernel module switch kernel module

led kernel module C/K USB module ?HubMgmt.so

In the event other TI programs are included on the CD(s) and are covered by a separate TI license, the TI-Navigator™ 3.x License shall take precedence over such other license.

The software program(s) contained on the CD(s) and any related documentation (collectively referred to as the Program) are licensed, not sold, by Texas Instruments Incorporated (TI) and/or any applicable licensors (collectively referred to as Licensor). Specific details of the license granted are set forth below. For purposes of this Agreement, a site ("Site") consists of one entire physical campus of an educational institution accredited by an association recognized by the U.S. Department of Education or the State Board of Education, or by their equivalents in other countries.

Licensor grants you a non-exclusive, non-transferable license to install and use the Program on all institution owned, leased or rented computers located at the Site for which the Program is licensed. You may make one copy of the software for backup and archival purposes. You agree to reproduce all copyright and proprietary notices shown in the software and on the media. Except as expressly stated herein or in the documentation, you may not duplicate such documentation. In cases where TI supplies the related documentation electronically you may print one copy of such documentation for each computer on which the Program is installed. Each member of the institution faculty may also use a copy of the Program on an additional computer for the sole purpose of preparing course materials.

Additional Terms:

WARRANTY DISCLAIMER AND DAMAGES EXCLUSIONS AND LIMITATIONS

Licensor does not warrant that the Program will be free from errors or will meet your specific requirements. Any statements made concerning the utility of the Program are not to be construed as express or implied warranties.

LICENSOR MAKES NO CONDITIONS OR WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED CONDITIONS OR WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT REGARDING THE PROGRAM AND MAKES THE PROGRAM AVAILABLE ON AN "AS IS" BASIS.

Although no warranty is given for the Program, the media, if the Program was delivered to you on a diskette or CD, will be replaced if found to be defective during the first ninety (90) days of use, when the package is returned postage prepaid to TI. THIS PARAGRAPH EXPRESSES LICENSOR'S MAXIMUM LIABILITY AND YOUR SOLE AND EXCLUSIVE REMEDY FOR DEFECTIVE MEDIA.

LICENSOR SHALL NOT BE RESPONSIBLE FOR ANY DAMAGES CAUSED BY THE USE OF THE PROGRAM, OR SUFFERED OR INCURRED BY YOU OR ANY OTHER PARTY INCLUDING BUT NOT LIMITED TO SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN JURISDICTIONS WHICH ALLOW TEXAS INSTRUMENTS TO LIMIT ITS LIABILITY, TI'S LIABILITY IS LIMITED TO THE APPLICABLE LICENSE FEE PAID BY YOU.

Because some states do not allow the exclusion or limitation of incidental or consequential damages or limitation on how long an implied warranty lasts, the above limitations or exclusions may not apply to you.

GENERAL

This Agreement will immediately terminate if you fail to comply with its terms. Upon termination of this Agreement, you agree to return or destroy the original package and all whole or partial copies of the Program in your possession and so certify in writing to TI.

The export and re-export of United States original software and documentation is subject to the Export Administration Act of 1969 as amended. Compliance with such regulations is your responsibility. You agree that you do not intend to nor will you, directly or indirectly, export, re-export or transmit the Program or technical data to any country to which such export, re-export or transmission is restricted by any applicable United States regulation or statute, without the proper written consent or license, if required of the Bureau of Export Administration of the United States Department of Commerce, or such other governmental entity as may have jurisdiction over such export, re-export or transmission.

If the Program is provided to the U.S. Government pursuant to a solicitation issued on or after December 1, 1995, the Program is provided with the commercial license rights and restrictions described elsewhere herein. If the Program is provided to the U.S. Government pursuant to a solicitation issued prior to December 1, 1995, the Program is provided with "Restricted Rights" as provided for in FAR, 48 CFR 52.227-14 (JUNE 1987) or DFAR, 48 CFR 252.227-7013 (OCT 1988), as applicable.

Manufacturer is Texas Instruments Incorporated, 7800 Banner Drive, M/S 3962, Dallas, Texas 75251.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the

author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.> Copyright (C) <year>
<name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

End of GPL

The following program files are covered by the LGPL. Additional files and licenses follow the LGPL.

glibc cajo.jar

LGPL follows:

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to

use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you

distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library's name and an idea of what it does.

Copyright (C) year name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

signature of Ty Coon, 1 April 1990

TI LearningCheck 3.x License Agreement

By downloading/installing this software and/or documentation, you agree to abide by the following provisions.

- 1 **License:** Subject to your payment of any applicable license fee, Texas Instruments Incorporated ("TI") grants you a license to copy and use the software program(s) and documentation from the linked web page or CD ROM ("Licensed Materials"). In addition to the copy resident on your computer, you may keep a copy on diskette or CD for backup / archive purposes.
- 2 **Restrictions:** You may not reverse-assemble or reverse-compile the software program portion of the Licensed Materials that are provided in object code format. You may not sell, rent, or lease copies of the Licensed Materials.
- 3 **Support:** Support for the Licensed Materials is described in the documentation that accompanies the software. Absent such documentation, support shall be provided by TI.
- 4 **Copyright:** The Licensed Materials and any accompanying documentation are copyrighted. If you make copies, do not delete the copyright notice, trademark, or protective notices from the copies.
- 5 **Warranty:** TI warrants that it has the right to provide the Licensed Materials. TI does not warrant that the Licensed Materials will be free from errors or will meet your specific requirements. **The Licensed Materials are made available "AS IS" to you or any subsequent user.**

Although no warranty is given for the Licensed Material, the media (if any) will be replaced if found to be defective during the first three (3) months of use, when the package is returned postage prepaid to TI. **THIS PARAGRAPH EXPRESSES TI'S MAXIMUM LIABILITY AND YOUR SOLE AND EXCLUSIVE REMEDY.**

- 6 **Limitations:** Except as explicitly stated above, TI makes no warranty or condition, either express or implied, including but not limited to any implied warranties of merchantability and fitness for a particular purpose, regarding the Licensed Materials.
In no event shall TI or its suppliers be liable for any indirect, incidental or consequential damages, loss of profits, loss of use or data, or interruption of business, whether the alleged damages are labeled in tort, contract or indemnity.
Some states or jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply.
- 7 **Additional terms:** This Agreement will immediately terminate if you fail to comply with its terms. Upon termination of this Agreement, you agree to return or destroy the original package and all whole or partial copies of the Program in your possession and so certify in writing to TI.

The export and re-export of United States original software and documentation is subject to the Export Administration Act of 1969 as amended. Compliance with such regulations is your responsibility. You agree that you do not intend to nor will you, directly or indirectly, export, re-export or transmit the Program or technical data to any country to which such export, re-export or transmission is restricted by any applicable United States regulation or statute, without the proper written consent or license, if required of the Bureau of Export Administration of the United States Department of Commerce, or such other governmental entity as may have jurisdiction over such export, re-export or transmission.

If the Program is provided to the U.S. Government pursuant to a solicitation issued on or after December 1, 1995, the Program is provided with the commercial license rights and restrictions described elsewhere herein. If the Program is provided to the U.S. Government pursuant to a solicitation issued prior to December 1, 1995, the Program is provided with "Restricted Rights" as provided for in FAR, 48 CFR 52.227-14 (JUNE 1987) or DFAR, 48 CFR 252.227-7013 (OCT 1988), as applicable.

The following program files are covered by the MOZILLA PUBLIC LICENSE. Additional files and licenses follow the MOZILLA PUBLIC LICENSE.

Fileblob.java

MOZILLA PUBLIC LICENSE follows:

MOZILLA PUBLIC LICENSE

Version 1.1

1. Definitions.

1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.

1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

- 1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
- 1.5. "Executable" means Covered Code in any form other than Source Code.
- 1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
- 1.7. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
- 1.8. "License" means this document.
- 1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.
- 1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
- A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
 - B. Any new file that contains any part of the Original Code or previous Modifications.
- 1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
- 1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.
- 1.11. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.
- 1.12. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

- (a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and
- (b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).
- (c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.
- (d) Notwithstanding Section 2.1(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

2.2. Contributor Grant.

Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

- (a) under intellectual property rights (other than patent or trademark) Licensable by Contributor, to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and
- (b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: 1) Modifications made by that Contributor (or portions thereof); and 2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).
- (c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes Commercial Use of the Covered Code.
- (d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; 3) for infringements caused by: i) third party modifications of Contributor Version or ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or 4) under Patent Claims infringed by Covered Code in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular

Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims.

If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modification is made available as described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor makes available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs.

If Contributor's Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the LEGAL file.

(c) Representations.

Contributor represents that, except as disclosed pursuant to Section 3.4(a) above, Contributor believes that Contributor's Modifications are Contributor's original creation(s) and/or Contributor has sufficient rights to grant the rights conveyed by this License.

3.5. Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modification(s) You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Covered Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License.

6.1. New Versions.

Netscape Communications Corporation ("Netscape") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by Netscape. No one other than Netscape has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.

If You create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), You must (a) rename Your license so that the phrases "Mozilla", "MOZILLAPL", "MOZPL", "Netscape", "MPL", "NPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the Mozilla Public License

and Netscape Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

(a) such Participant's Contributor Version directly or indirectly infringes any patent, then any and all rights granted by such Participant to You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to pay Participant a mutually agreeable reasonable royalty for Your past and future use of Modifications made by such Participant, or (ii) withdraw Your litigation claim with respect to the Contributor Version against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties or the litigation claim is not withdrawn, the rights granted by Participant to You under Sections 2.1 and/or 2.2 automatically terminate at the expiration of the 60 day notice period specified above.

(b) any software, hardware, or device, other than such Participant's Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

8.3. If You assert a patent infringement claim against Participant alleging that such Participant's Contributor Version directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

8.4. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as "Multiple-Licensed". "Multiple-Licensed" means that the Initial Developer permits you to utilize portions of the Covered Code under Your choice of the NPL or the alternative licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A -Mozilla Public License.

``The contents of this file are subject to the Mozilla Public License Version 1.1 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at <http://www.mozilla.org/MPL/>

derby.jar

APACHE LICENSE VERSION 2.0 follows:

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
