

Teacher Notes for Centroid

- 1) The optimal situation for this lesson would be TI Navigator. Using the screen capture tool available on TI Navigator would allow the teacher to see each student's progress in real time.
- 2) If Navigator is not available the next best choice would be to have student access to a computer with TI Connect software. In this way a hard copy of student work could be handed in for Teacher review.
- 3) An alternative option would be to have select students transfer their APPVAR to the view screen calculator and lead the class through the created file. TI presentation link for the TI-84+ would also be useful for this purpose.
- 4) Also included in this lesson is the APPVAR CNTROID. As a summary for the lesson the teacher could use this file and compare with the student created files,
