I. Read the directions on page 1.1, then analyze the graph of $\mathrm{f} 1(\mathrm{x})$ created on page 1.2 (as seen below). Create a table of values (you may go to the menu, view, then add a function table on page 1.2 to see a table).

Table

| $x$ | $f 1(x)$ |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

II. Go to page 1.3. Graph $\mathrm{f} 1(\mathrm{x})$. In $\mathrm{f} 2(\mathrm{x})$, create the equation $2 \mathrm{f} 1(\mathrm{x})$. Using various representations (graph, table, etc), analyze changes. Include what is the same and what is different in the domain, range, graph, and table. In f3(x), write an equivalent equation to represent f2(x).
Graph

| Similarities | Differences |
| :--- | :--- |
|  |  |
|  |  |
|  |  |

III. Go to page 2.1. Using the same function as the previous problem, graph $\mathrm{f} 1(\mathrm{x})$. In f2(x), create the equation -f1(x). Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In $\mathrm{f} 3(\mathrm{x})$, write an equivalent equation to represent $\mathrm{f} 2(\mathrm{x})$.

Compare situations I, II, and III. How are $\mathrm{f}(\mathrm{x}), 2 \mathrm{f}(\mathrm{x})$, and $-\mathrm{f}(\mathrm{x})$ related?
IV. Go to page 3.1. Using the same function as the previous problem, graph $\mathrm{f} 1(\mathrm{x})$. In $\mathrm{f} 2(\mathrm{x})$, create the equation $\mathrm{f} 1(\mathrm{x})+2$. Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In $\mathrm{f} 3(\mathrm{x})$, write an equivalent equation to represent $\mathrm{f} 2(\mathrm{x})$.

|  |  |
|  |  |
|  |  |

V. Go to page 4.1. Using the same function as the previous problem, graph f1(x). In f2(x), create the equation f1(x-2). Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In $\mathrm{f} 3(\mathrm{x})$, write an equivalent equation to represent f2(x).

VI. Go to page 5.1. Using the same function as the previous problem, graph $\mathrm{f} 1(\mathrm{x})$. In $\mathrm{f} 2(\mathrm{x})$, create the equation $\mathrm{f} 1(2 \mathrm{x})$. Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In $\mathrm{f} 3(\mathrm{x})$, write an equivalent equation to represent f2(x).

|  |  |
|  |  |

VII. Go to page 6.1. Using the same function as the previous problem, graph f1(x). In f2(x), create the equation $\mathrm{f} 1(-\mathrm{x})$. Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In f3(x), write an equivalent equation to represent $\mathrm{f} 2(\mathrm{x})$.
Graph

VIII. Go to page 7.1. Using the same function as the previous problem, graph f1(x). In $\mathrm{f} 2(\mathrm{x})$, create the equation $\mathrm{f} 1(\mathrm{x})+2$. Using various representations, , analyze changes in the graph and table. Include what is the same and what is different in the domain, range, graph, and table. In f3(x), write an equivalent equation to represent f2(x).
