

## TI – 73 EXPLORER<sup>™</sup> 7<sup>™</sup> GRADE ACTIVITY 15: PLAY FOR LO OR HI

ACTIVITY OVERVIEW: In this activity we will <ul> <li>Use the Smile Math Application</li> <li>Develop number sense with Smile Math App</li> </ul> <li>Note: You will use the Smile App in this activity.</li>	SMILE Nationalies
Press your 9 key and select <b>SMILEMth</b> by pressing the number next to it. Press any key 4 times to get to the <b>SELECT A GAME</b> menu. Press <b>1: MINIMAX.</b> There are four games you can play against another player.	SELECT AN OPERATION MINIMAX ADDITION 2: SUBTRACTION 3: MULTIPLICATION 4: DIVISION (QUIT) (HELP)
Try the addition game first. Pick the minimum number. Then put in your player initials	
All games work essentially the same way. There is a minimum or maximum option. If you play the minimum option, you are attempting to get the smallest sum by strategically placing the numbers you are presented.	
Each game has a help section. Press the keys below the "softkeys" to navigate through the HELP section.	NIDINAX HELP PLAVING THE DANIE - USE + 8.4 TO CHODSE WHERE TO PLACE THE DIGIT. - PRESS CENTER] TO PASTE THE DIGIT IN PLACE. (QUIT HELP) (BACK(NEXT)

You have to decide from the beginning how you will "play" your numbers. Will it be best to put the biggest or smallest digit in the units place of either number in order to minimize your answer? After the first two numbers, how are these players doing? The 0 was their first number. Could you suggest an alternate strategy?	HINIKUK NUKBER PLAYER: ABC 3RD NUMBER: 7 ABC 1 + 0 TXN 1 + 0 TXN 1 + 0 (QUIT) (HELP)
Here is an example of a division problem where you want to achieve a maximum result. Where would be the best place to put the 4?	HAXINUN NUMBER PLAYER: ABC IST NUMBER: 4 ABC :: : : : : : : : : : : : : : : : : :
Now that the two players have chosen, who is in a better position? Is it too early to tell?	HAXIXULI OULISER PLAYER: ABC 2ND NUMBER: 6 ABC 40 ÷ 10 TXN 10 ÷ 14 TXN 10 ÷ 14 (QUIT) (HELP)
At the end of some games, you're not done! You still have to enter the answer in order to win. The calculator then compares your answer and declares a winner. In other games, you have to pick the number that would win, to check your ability to compare numbers.	HINIKUK NUKISIA HINDER: AAA 299<371 AAA 234 + 65 = 299 HELL DONE CAA 326 + 45 = 371 (QUIT PLAYAGAIN) (HELP)
