# Notefolio™ App

TI-89 Titanium
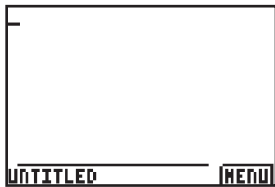

TI-84 Plus

Voyage™ 200

This App comes with the TI Keyboard to allow users to type in text and perform simple word processing tasks on their handheld. Transfer notes from the handheld to the computer, edit or import information into Word® or simple text files on a computer, and then print. Files can also be transferred from a computer to a handheld to add more notes.

1

Select NoteFolio from the APPS menu.

2

The App launches with a blank window, ready to accept typed text.

3

Type notes just like on a computer.

4

Choose to save the file at any time. The new file name appears in the information bar.

5

Using the EDIT menu, do simple editing, including UNDO, CUT, COPY, PASTE, and FIND.

6

Choose the size of text that appears in the viewing window. Make it smaller to fit more on the screen.

7

Change back to a larger font.
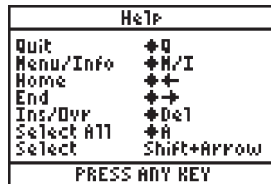

8

In the HELP menu, find the keyboard shortcut commands.
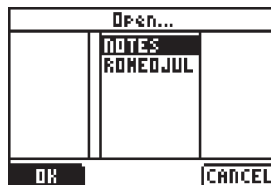

9

On opening NoteFolio, a list of saved Notes appears on the screen.

10

Both the TI-83 Plus and TI-83 Plus Silver Edition may automatically Power Down between uses (this is designed to extend the battery life). Always be sure the handheld is turned on before entering data.
