## Transformers

ID: 8776
In this activity, you will explore:

- Reflecting and rotating polygons
- Multiplying matrices to transform polygons
- Applying multiple transformations to a polygon

Name $\qquad$ Class $\qquad$

To start, open the program TRANSFOR found in the Programs menu.

## Problem 1 - Symmetry group for a square

Identity

| Sketch | Description | Inverse |
| :---: | :---: | :---: |
|  | no change |  |
|  |  | no change |

## Reflections

| Sketch | Description | Inverse |
| :---: | :---: | :---: |
|  | reflect over $x=0$ | reflect over $x=0$ |
|  | reflect over $y=\_$ | reflect over $y=$reflect over $y=$ |
|  |  |  |
|  |  |  |

Rotations

| Sketch | Description | Inverse |
| :--- | :---: | :---: |
|  | rotate around origin____ |  |
|  | rotate around origin____ |  |
|  | rotate around origin___ |  |
|  |  |  |

- How many different transformations are in the symmetry group of a square? Include the identity.
- What do you notice about the inverse transformations? Describe them.

## Problem 2 - Transformer matrices

original square $S$

$S$

$$
\left[\begin{array}{ll}
a & b \\
c & d \\
e & f \\
g & h
\end{array}\right]
$$

$\times$

$$
T_{1}
$$

$$
\times\left[\begin{array}{cc}
-1 & 0 \\
0 & 1
\end{array}\right]=
$$

image square $S^{\prime}$

$S^{\prime}$

$$
\left[\begin{array}{ll}
-a & b \\
-c & d \\
-e & f \\
-g & h
\end{array}\right]
$$

- Find $\mathbf{S}^{\star} \boldsymbol{T} \mathbf{2}$. ( $\boldsymbol{T} \mathbf{2}$ is given below).
- What transformations could T2 correspond to?

Complete the table.
$\left.\begin{array}{|c|c|c|}\hline \text { Transformer Matrix } & \text { Sketch } & \text { Description } \\ \hline T_{0}=\left[\begin{array}{ll}1 & 0 \\ 0 & 1\end{array}\right] & & \text { no change } \\ \hline T_{1}=\left[\begin{array}{cc}-1 & 0 \\ 0 & 1\end{array}\right] & & \\ \hline T_{2}=\left[\begin{array}{cc}1 & 0 \\ 0 & -1\end{array}\right] & & \text { reflect over } x=0 \\ \hline T_{3}=\left[\begin{array}{cc}-1 & 0 \\ 0 & -1\end{array}\right] & & \\ \hline T_{4}=\left[\begin{array}{cc}0 & 1 \\ 1 & 0\end{array}\right] \\ T_{5}=\left[\begin{array}{cc}0 & -1 \\ 1 & 0\end{array}\right] \\ T_{6}=\left[\begin{array}{cc}0 & 1 \\ -1 & 0\end{array}\right] & & \\ \hline-1 & 0\end{array}\right] \quad\left[\begin{array}{cc}0 & \\ \hline\end{array}\right.$

## II-nspire

Use the description columns to match the transformer matrices with their inverses. For example, $T_{1}$ is its own inverse.

| Transformer Matrix | Inverse | Transformer Matrix | Inverse |
| :---: | :---: | :---: | :---: |
| $T_{0}=\left[\begin{array}{ll}1 & 0 \\ 0 & 1\end{array}\right]$ |  | $T_{1}=\left[\begin{array}{cc}-1 & 0 \\ 0 & 1\end{array}\right]$ | $T_{1}=\left[\begin{array}{cc}-1 & 0 \\ 0 & 1\end{array}\right]$ |
| $T_{2}=\left[\begin{array}{cc}1 & 0 \\ 0 & -1\end{array}\right]$ |  | $T_{3}=\left[\begin{array}{cc}-1 & 0 \\ 0 & -1\end{array}\right]$ |  |
| $T_{4}=\left[\begin{array}{cc}0 & 1 \\ 1 & 0\end{array}\right]$ | $T_{5}=\left[\begin{array}{cc}0 & -1 \\ 1 & 0\end{array}\right]$ |  |  |
| $T_{6}=\left[\begin{array}{cc}0 & 1 \\ -1 & 0\end{array}\right]$ | $T_{7}=\left[\begin{array}{cc}0 & -1 \\ -1 & 0\end{array}\right]$ |  |  |

- Multiply each transformer matrix in the table above by its inverse. What do you notice?

Use matrix multiplication to answer each question.

- What is the effect of applying $T_{3}$ followed by $T_{5}$ ?
- What is the effect of applying $T_{2}$ followed by $T_{3}$ ?

## II-nspire

Problem 3 - Symmetry group for an equilateral triangle
Use these transformer matrices.
$T_{0}=\left[\begin{array}{ll}1 & 0 \\ 0 & 1\end{array}\right] \quad T_{1}=\left[\begin{array}{cc}-1 & 0 \\ 0 & 1\end{array}\right] \quad T_{2}=\left[\begin{array}{cc}-\frac{1}{2} & -\frac{\sqrt{3}}{2} \\ \frac{\sqrt{3}}{2} & -\frac{1}{2}\end{array}\right] \quad T_{3}=\left[\begin{array}{cc}-\frac{1}{2} & \frac{\sqrt{3}}{2} \\ -\frac{\sqrt{3}}{2} & -\frac{1}{2}\end{array}\right]$

| Sketch | Description | Inverse | Transformer Matrix |
| :--- | :--- | :--- | :--- |
|  |  |  | $T_{0}=\left[\begin{array}{ll}1 & 0 \\ 0 & 1\end{array}\right]$ |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
