Test preparation: Resetting all memory

Use this method when exams require clearing all memory including Scratchpad, documents and programs. Documents and programs will be deleted, not disabled.

**IMPORTANT:** Resetting all memory permanently deletes all user-entered data and files from the calculator. You may want to back up your TI-Nspire™ handheld to a computer before resetting.*

### Resetting all memory

**Before the exam**

Resetting all memory prior to exams will ensure that no user-saved information is available during the exam.

**After each exam**

Repeating all of the steps will reset all memory again and ensure that any information entered or saved by the user during test is permanently deleted.

* Use TI-Nspire™ computer software to back up your handheld prior to preparing it for an exam (resetting all memory) and to restore data and files after the exam.

1) Press \[2\] to open the My Documents file browser.

2) Press \[\text{menu}\] to open the context menu. Select \[\text{C: Delete All}\] (You may need to arrow down).

3) The Data Loss dialog box opens. Click \[\text{OK}\] to confirm that you want to clear the handheld memory and programs.

4) All factory defaults are restored. Click \[\text{OK}\] to complete.
