Transformation Graphing APP – updated

Need

Transform a function to a parent function.

Update

- Two transform functions! (new)
- Graphs in Y3-Y0 allowed! (new)

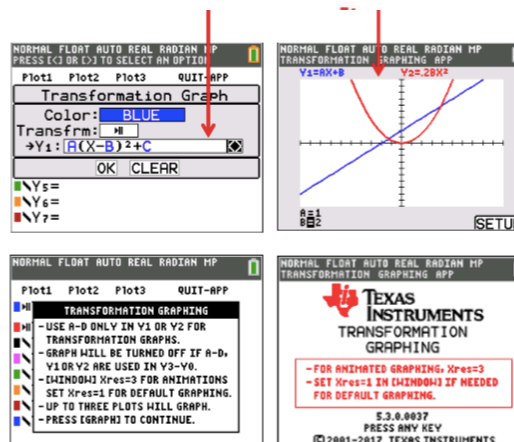

- SETUP now moves from GRAPH to SETTINGS for easy setup.

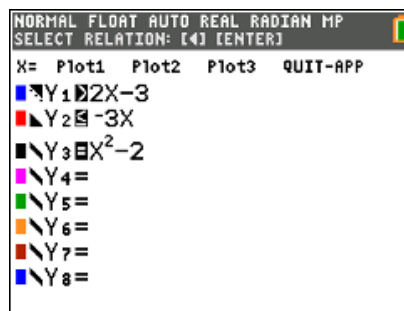

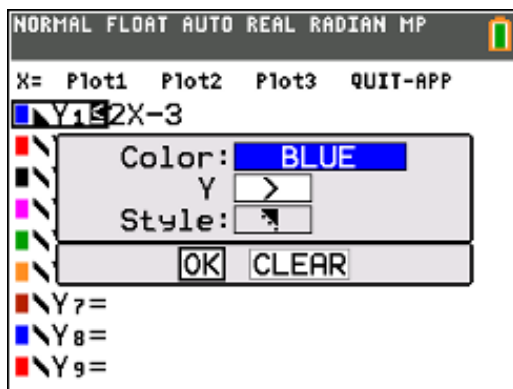

Note: Transformation Graphing App v 5.3 will only run on CE OS 5.3 or higher. App must match OS version!

- Two transform functions! (new)
 - Use the new spinner to populate standard functions!
 - Use only A,B,C, and D for transformations (existing)
- Graphs in Y3-Y0 allowed! (new)
 - Do not reference Y1 or Y2.
 - Do not use A-D in Y3-Y0. Reserved.
- Launches with Xres=3 vs Xres=1.
 - If Y3-Y0 are not smooth, consider changing Xres = 1 in [window] (default for OS).
 - If Xres=1, any Transformation animations will be slow.
 - Run App only when transformation is needed.

Classroom Management – Unit-Unit RESEND File Transfer Enhancement

Problem: "I want my students to experience STEM in Sports "The Kick!" but I have to transfer to each calculator twice!
First the program and then the two Image Vars. Help!

Solution: Retain a list of different calculator file types* to "resend."

- Transfer first set of files
 - Select the mixed file types from All-
 - Transmit (send) the files to a connected calculator in Receive state (Waiting...)
 - The RESEND screen populates with this set of files.
- "RESEND" - Resend a set of files unit to unit [2nd] [link] (above [X,T,θ,n])
 - After "Done" confirmation screen,
 - [2nd][link] RESEND seen on Context Help line
 - Set up Receiving calculator to "Waiting..."
 - Select TRANSMIT from the RESEND screen to resend.
 - Files can be deselected if needed.
